- **Soft Skills:**
  Adaptabilty, Self learning,

LANGUAGES

- English
- Malaylam

PROFILE

Dedicated and skilled MERN stack developer with a passion for creating innovative web applications and solving complex problems. Proven track record in delivering advanced solutions, actively seeking opportunities to leverage expertise and collaborate with professionals for career growth.

PROJECTS

Carzio :- Platform where users can rent cars

Designed and developed Carzio, a car rental platform enabling users to search, rent cars, view detailed profiles, and manage bookings efficiently.

- Utilized the **Repository Pattern** to separate business logic and data access, improving code reusability and maintainability.
- Integrated real-time notifications and chat using **Socket.IO** for seamless communication between users and providers.
- Integrated **Stripe** for secure payment processing, enabling seamless transactions and smooth user experience.
- Leveraged **Cloudinary** for secure and efficient storage of car images, ensuring optimized image delivery.
- Implemented secure authentication with **JWT,** OTP verification, and email authentication via **Nodemailer** for robust account
- Technologies**: React, Node.js, Express.js, MongoDB, Socket.IO, Nginx, EC2, Tailwind CSS, Cloudinary, and Vercel**.

AppStore :- E Commerce Website for Apple Products

AppStore is an e-commerce platform focused on Apple products, offering a seamless shopping experience.

- Integrated **Multer** for secure file uploads, handling product images and media for smooth product management.
- Implemented **Razorpay** for secure payment processing, allowing users to complete transactions with confirmation and order details.
- **Session-based Authentication** used to manage user login and maintain secure sessions across the platform.
- **Coupon** System integrated to provide discounts during checkout, enhancing user engagement and promoting sales.
- Technologies used: React, **Node.js, Express.js, MongoDB**, HTML, CSS, **Bootstrap, Javascript,** Nginx, EC2
